Voyager L6
Green Laser Presenter

travitek™
Professional Presentation Tools™

From controlling keyboard and mouse functions to a green laser pointer perfect for presentations, this sleek multi-function laser presenter does it all. Plug the wireless receiver into any available USB port on your computer and you are ready to take control of your presentation. No special software or drivers needed! The L6 also includes a slot to put your own Micro SD card containing your important presentation or other documents.

Why Green?

Highly visible and extremely bright, the green laser pointer in the L6 is great for presentations in large auditoriums. About 50 times brighter than a red laser, the L6's green laser dot can be seen from much further away than an ordinary red laser dot. And, the 33 foot transmission range means you can control you presentation from just about anywhere in the room.
